Department of Logistics  
University of Belgrade, Serbia  
Faculty of Transport and Traffic Engineering  
Vojvode Stepe 305

## FIRST CALL FOR PAPERS

We are pleased to invite you to LOGIC International conference launched with the objective to become forum and meeting place where participants from universities, institutes, companies and public institutions from different logistics related fields will have opportunity for collaboration and exchanging ideas.

### LOGISTICS - BEST PRACTICE

Within the LOGIC conference series of sessions, presentations and workshops will be organized. The aim is to present actual trends in logistics, practical achievements in business and public sector and particularly best practice cases.

The idea behind initiation of a specific program session "Logistics – Best practice" is an attempt to connect theoretical knowledge and academic research with the real problems in logistics, providing synergy of theory and practice. We do believe it is of crucial importance for development and advancement of logistics business and activities, as well as for further theoretical advances in logistics theory. Furthermore, companies and institutions interested in contributing the conference through promotion and presentation of its business areas and activities are also welcome.

Therefore, all logisticians, those who feel so, and those who are professionally related to logistics, in addition to traditional form of papers submission and presentation, are also welcome to contribute the conference through:

- Visual and audio visual presentations
- Active participation in discussions, workshops and panel sessions

### CONFERENCE TOPICS & REGISTRATION

If you are interested in participating conference by presentation or proposing discussion related to certain topic which is important to your company or institution, or which represents best practice case, LOGIC program committee invites you to submit your contribution in this form. Please note that the list of topics listed at the conference web site could be understood rather as a remainder then a rule, and authors are encouraged to submit contribution to any of logistics related areas.

Registration details can also be found at the conference web site.
